ABOUT ME

Web developer with hands-on experience building applications using React.js, Angular, Node.js, and the MERN stack (React.js, Express, Node.js, MongoDB). I also work with MySQL + Knex to build reliable backend services and APIs.

I have developed web applications mainly with Angular (version 8+) and Bootstrap. My last projects have been Spring Boot, Node.js/Express.js or Django Rest Framework in backend and MySQL, MongoDB databases.

I am a fast learner, hard worker, and team player developer. I'm known for my strong problem-solving mindset and my capacity to collaborate effectively in team-driven environments. My goal is to increase my software development skills and become a better professional every day.

WORK EXPERIENCE

Full-Stack Developer

02/2023 – Current

Transport Information System (Sitrans)

- Led the development group in creating, testing, and deploying web applications as modular and scalable software products.
- Built, tested, and deployed web applications using JavaScript/TypeScript, Angular 8+, Spring Boot, NodeJS, Express on backend, and MySQL, MongoDB databases.
- Utilized technologies such as ReactJs, TailwindCSS, MUI Material, and Bootstrap for frontend development.
- My work focused on ensuring the quality and scalability of the applications developed, as well as fostering team collaboration and performance.

Full-Stack Developer & Professor

09/2016 – 2023

University of Maximo Gomez Baez

- Designed and implemented modular desktop and web applications using JavaScript/TypeScript, Bootstrap, Angular, NodeJS, and Django Rest Framework in backend with MySQL and MongoDB databases.

- Managed the full software development lifecycle, from requirements gathering to deployment, ensuring high-quality deliverables.
- Delivered lectures and practical sessions in Object Oriented Programming, Data Structures, Databases, and Artificial Intelligence, mentoring over 200 students across multiple academic years.
- Guided students in developing real-world projects, fostering practical skills and a problem-solving mindset.

PROJECTS

IES Manager

04/2023 – 06/2025

Data management tool for Futura applications

- Control of courses, scholarships, programs, universities, referrals, etc., Mexico, Colombia, China, Argentina, Cuba among others.
- **Skills:** Requirements Analysis | MVC Architecture | React.js | HTML5 | CSS3 | JavaScript | MongoDB | Front-end and Backend Development | Bootstrap | Node.js | Express.js | Microsoft Visual Studio | Postman | Powerby | Git | Webpack

EDUCATION & TRAINING

Computer Science Engineering

09/2011 – 07/2016

Máximo Gómez Báez University, Ciego de Ávila, Cuba

- During my five years of study, I gained solid knowledge in key areas such as Algorithms and Data Structures, Operating Systems, Computer Networks, Artificial Intelligence, Databases and Software Development.
- My thesis focused on the development of a **"Trace Control System for the Proxy Server"**, which allowed me to consolidate my technical skills in Java, MySQL, Play Framework, and web development. The system enabled administrators to visualize navigation traces, generate reports, and detect unauthorized access, validating user credentials against the Active Directory domain server through the LDAP protocol.
- Additionally, I gained experience in programming with Java, JavaScript, HTML5, CSS3, Bootstrap, MySQL, and SQL, developing skills in database management, software development, and complex problem-solving, always working effectively in a team.

Field(s) of study: Computer Science Engineering | **Thesis:** "Trace Control System for the Proxy Server at the University of Ciego de Ávila Máximo Gómez Báez" | **Website:** <https://www.unica.cu/>

Master in Applied Computer Science

01/2019 – 02/2022

Máximo Gómez Báez University, Ciego de Ávila, Cuba

- During this period, I deepened my knowledge in advanced areas such as Artificial Intelligence, Machine Learning, Big Data, Cybersecurity, and Cloud Computing.
- My thesis focused on the development of a **"Computer Tool for Pattern Detection in Proxy Server Traffic Logs"** using unsupervised learning techniques, specifically the K-means clustering algorithm. The tool was developed using Python with the Web2py framework, Anaconda with Scikit-learn for machine learning, and MariaDB as the database.
- This research allowed me to apply machine learning techniques to real-world problems, detecting suspicious behavior patterns in internet usage and supporting decision-making for network administrators. The tool was validated through expert criteria and quality evaluations according to the ISO/IEC 25010 standard.

Field(s) of study: Applied Computer Science | **Thesis:** "Computer Tool for Pattern Detection in Proxy Server Traffic Logs" | **Website:** <https://www.unica.cu/>

SKILLS

MERN Stack & Web

JavaScript / TypeScript

React.js

React Hooks / Redux

Angular 8+

Node.js / Express.js

MongoDB / Mongoose

Bootstrap

TailwindCSS

MUI Material

Backend & Databases

Spring Boot

Django Rest Framework

RESTful APIs

MySQL / Knex.js

PostgreSQL

MongoDB

DevOps & Tools

Docker (docker compose)

Digital Ocean

Jenkins / CI

Git

Gradle

Asana

Design & Others

WordPress / PHP

SEO

Postman

Microsoft Office

VS Code

COMMUNICATION & INTERPERSONAL SKILLS

Effective Communication

- Ability to communicate ideas clearly and concisely, both verbally and in writing.
- Experience in drafting detailed reports and persuasive presentations for diverse audiences.

Interpersonal Skills

- Ability to build and maintain strong relationships with colleagues, clients, and partners.
- Capability to work in a team, fostering a collaborative and respectful environment.

Conflict Resolution

- Experience in mediating conflicts and finding mutually beneficial solutions.
- Skill in handling difficult situations with diplomacy and tact.

Active Listening

- Ability to listen attentively and understand the needs and concerns of others.
- Skill in providing constructive feedback and receiving criticism positively.

Adaptability

- Ability to adapt to different communication styles depending on the audience and context.
- Skill in managing multiple tasks and priorities in a dynamic environment.

PERSONAL SKILLS

✓ Fast learner

✓ Hard worker

✓ Team player

✓ Adaptability

✓ Problem-solving

LANGUAGES

Spanish - Native

English - Medium Level
